

COMFORT.PACK with PAPERplus® Classic CX and
PAPERplus® Track
Retail for pneumatics and fittings

OPTIMIZED LOGISTICS PROCESSES

STASTO Automation KG, based in Innsbruck, is a family-owned company that focuses on high-quality solutions in the fields of pneumatics, fittings, and automation. In addition to an extensive product range, STASTO offers customized services that help its customers reduce installation costs, make processes more efficient, and avoid downtime.

PRODUCTS: Solutions in the fields of pneumatics, fittings, and automation

SCOPE: COMFORT.PACK double packing station with PAPERplus® Classic CX belt system, PAPERplus® Track under-table machines, and electrically height-adjustable lift tables

CHALLENGE – ERGONOMICS WITH INCREASING VOLUMES

In order to meet steady growth and high demands for quality, reliability, and efficiency, STASTO needed a packaging solution that was both ergonomic and flexible. The company's goal was to optimize the packaging process, efficiently provide protective packaging at multiple packing stations, and be able to handle even large packages with ease.

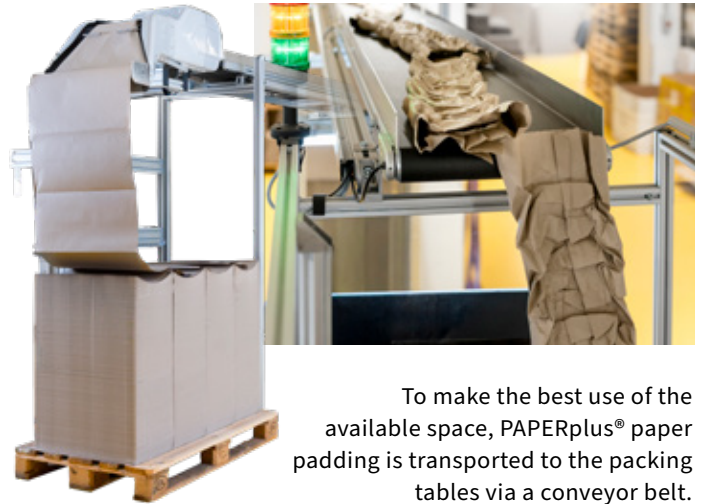

A particular challenge was seamless integration into existing logistics processes.

SOLUTION - COMFORT.PACK WITH PAPERplus® Classic CX and PAPERplus® Track UNDER-TABLE MACHINES

Storopack implements a combination of different PAPERplus® systems at STASTO: The PAPERplus® Classic CX produces robust and versatile paper cushions for heavy products using a knife-free technology. The machine draws the paper directly from the pallet, making it ideal for the high throughput at STASTO. The cushions produced by the PAPERplus® Classic CX are transported via a conveyor belt to a silo that supplies two packing stations. This allows users to benefit from safe and ergonomic workflows.

Additional PAPERplus® Track under-table machines are available at both packing stations to flexibly produce further pads. This combination enables a continuous supply. The setup is complemented by electrically height-adjustable lift tables, which enable ergonomic packaging even for large-format shipments.

To make the best use of the available space, PAPERplus® paper padding is transported to the packing tables via a conveyor belt.

RESULT - SUSTAINABLE SOLUTIONS FOR OPTIMIZED PROCESSES

Thanks to Storopack's new packaging solution, STASTO benefits from a more efficient packaging process.

"The cushions are always available in sufficient quantities at several packing stations, and the ergonomic working method reduces the physical strain on our employees," reports Dieter Stocker, partner at STASTO. "At the same time, the paper cushions ensure optimal product protection, preventing damage during transport." The solution thus not only supports STASTO's logistics processes, but also the company's commitment to successfully combining quality, sustainability, and innovation.

STOROPACK – PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

ALL BASES COVERED

We at Storopack would like to offer our customers the very best, which is why we take great pride in the ability to listen, comprehensive consulting, and long-term services across all sectors. Our products and solutions are tailored specifically to your requirements. We support you until you achieve the ideal results and even beyond – locally around the world.
